PROFESSIONAL SUMMARY

Senior Software Engineer with nearly 4 years of full-stack experience building scalable, high-performance web applications and distributed backend services in Go, TypeScript, React, Next.js, and Node.js. Specializes in microservices architecture, REST and GraphQL API design, Ethereum integration, and performance optimization, with a track record of leading technical planning, mentoring engineers, and setting engineering standards.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, SQL

Frontend: React, Next.js, Redux, Server-Side Rendering, Responsive UI Development

Backend & APIs: Node.js, NestJS, Microservices Architecture, Event-Driven Systems, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, Kafka, Nginx, Jenkins, CI/CD Pipelines, Git

Testing & Observability: Go Testing, Testify, Testcontainers, Unit & Integration Testing, Prometheus, Grafana, Sentry

Blockchain: Ethereum, Smart Contract Integration, Crypto Wallet Applications

Practices: System Design, Sprint Planning, Agile/Scrum, Code Review, Technical Mentoring, Performance Optimization

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Jul 2025 – Present

BotCalm (PVT) Ltd. | Sri Lanka

- Design Go microservices architecture for a 17-service compliance platform (KYC, AML, fraud, transaction monitoring), defining service boundaries, Kafka-based event flows, and Kubernetes deployment topology provisioned via Terraform.
- Lead technical planning across the engineering team, owning technical roadmaps, sprint planning, and cross-functional delivery coordination.
- Established team-wide coding standards, code review guidelines, and a Go testing practice (unit and integration tests via Testify and Testcontainers), improving code consistency and reducing review turnaround.
- Mentor 20+ junior and mid-level engineers on Go, React, Next.js, and blockchain integration through structured guidance and knowledge-sharing sessions, raising code quality and team throughput.

Software Engineer

Jul 2024 – Jul 2025

BotCalm (PVT) Ltd. | Sri Lanka

- Architected and delivered a full crypto ecosystem for an Ethereum-based token in Next.js and TypeScript, collaborating with cross-functional teams on a scalable, high-performance platform.
- Optimized the ecosystem wallet application through Redis-backed caching, Next.js standalone build output, and Docker image/build-time improvements, reducing deployment and page-load overhead.
- Built the Game API integration for a crypto gaming platform, connecting a third-party game provider to expand the platform catalogue and increase user engagement.

Software Engineer

May 2024 – Jun 2024

Sphiria Digital Studio (PVT) Ltd. | Sri Lanka

- Led development of a customer portal for ticket management, task assignment, and client communication, streamlining support workflows.
- Extended the internal Company Management System with advanced workflow modules to support additional business processes.
- Implemented platform-wide performance optimizations and led code reviews to promote engineering best practices.

Junior Software Engineer

Apr 2023 – May 2024

Sphiria Digital Studio (PVT) Ltd. | Sri Lanka | Joined as Software Engineer Intern, Jan 2023

- Developed a two-sided platform connecting event managers with audio/video providers, with event listings, real-time chat, and proposal submission.
- Built integrated modules for a custom Company Management System and applied performance and UX optimizations, contributing actively to code reviews and knowledge-sharing sessions.

EDUCATION

BSc (Hons) Computer Science — University of Staffordshire, United Kingdom

2023 – 2024

Advanced Diploma in Computer Science — Scottish Qualifications Authority (SQA)

2020 – 2022

Higher National Diploma in Business Management — NIBM

2017 – 2019

Diploma in Information Technology — ESoft Metro Campus

2014
