PROFESSIONAL SUMMARY

Software Engineer with nearly 4 years of software engineering experience across full-stack development, backend services, and technical leadership. Experienced in Go, TypeScript, React, Next.js, NestJS and Node.js, with hands-on work in microservices, event-driven architectures, API design, and cloud-native deployments. Leads system architecture and technical planning, establishes engineering practices, and mentors developers.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript

Frontend: React, Next.js, Redux, Server-Side Rendering, Responsive UI Development

Backend & APIs: Node.js, NestJS, Microservices Architecture, Event-Driven Systems, REST APIs, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, Kafka, Nginx, Jenkins, CI/CD Pipelines, Git

Testing & Observability: Go Testing, Testify, Testcontainers, Unit & Integration Testing, Prometheus, Grafana, Sentry

Blockchain: Ethereum, Smart Contract Integration, Crypto Wallet Applications

Practices: System Design, Sprint Planning, Agile/Scrum, Code Review, Technical Mentoring, Performance Optimization

PROFESSIONAL EXPERIENCE

BOTCALM (PVT) LTD. | Sri Lanka

Senior Software Engineer Jul 2025 – Present

- Lead architecture for a 17-service compliance platform covering KYC, AML, fraud, and transaction monitoring; define service boundaries, Kafka-based event flows, and Kubernetes deployment topology provisioned with Terraform.
- Lead technical planning across the engineering team, including technical roadmaps, sprint planning, and cross-functional delivery coordination.
- Established team coding standards, code review guidelines, and Go unit/integration testing practices using Testify and Testcontainers.
- Mentor and provide technical guidance to 20+ junior and mid-level engineers across Go, React, Next.js, and blockchain integration through guidance and knowledge-sharing sessions.

Software Engineer Jul 2024 – Jul 2025

- Architected and delivered a full crypto ecosystem for an Ethereum-based token using Next.js and TypeScript, working with cross-functional teams.
- Optimized a wallet application using Redis-backed caching, Next.js standalone build output, and Docker image/build-time improvements.
- Integrated a third-party Game API into a crypto gaming platform, connecting the provider to the application's game catalogue

SPHIRIA DIGITAL STUDIO (PVT) LTD. | Sri Lanka

Software Engineer May 2024 – Jun 2024

- Led development of a customer portal for ticket management, task assignment, and client communication to streamline support workflows.
- Extended the internal Company Management System with workflow modules and implemented platform performance optimizations.
- Led code reviews to promote engineering best practices

Junior Software Engineer | *Joined as Software Engineer Intern, Jan 2023* Apr 2023 – May 2024

- Developed a two-sided platform connecting event managers with audio/video providers, including event listings, real-time chat, and proposal submission.
- Built modules for a custom Company Management System and contributed performance and user-experience improvements, code reviews, and knowledge sharing.

EDUCATION

BSc (Hons) Computer Science — University of Staffordshire, United Kingdom 2023 – 2024

Advanced Diploma in Computer Science — Scottish Qualifications Authority (SQA) 2020 – 2022

Higher National Diploma in Business Management — NIBM 2017 – 2019

Diploma in Information Technology — ESoft Metro Campus 2014
